

1 Secure the waist belt around your waist so the belle rubber label faces out.

2 Position your baby against your abdomen so the waist belt and one of your hands support them.

3 Lay one strap at a time over your shoulder.

4 Reach behind your back, grab the strap, and cross it to the opposite side front pouch buckle.

5 Place the other strap over your shoulder and cross it to the other front pouch buckle.

6 Adjust the tension on the straps to have your baby securely against you.
